**A2 Size version –**

**Cutting:**

**White:**

Card Base: 5 ½" x 8 ½" and fold in half

Front Layer: 3 ¾" x 5"

Inside Layers: (2) 2 1/8" x 3 1/8"

(2) 7/8" x 5 1/8"

(4) 7/8" x 1 5/8"

**Mint Julip:**

Mechanism piece: 5 3/8" x 8 ½" (this is your storybook fold insert)

Front Layer: 4" x 5 ¼"

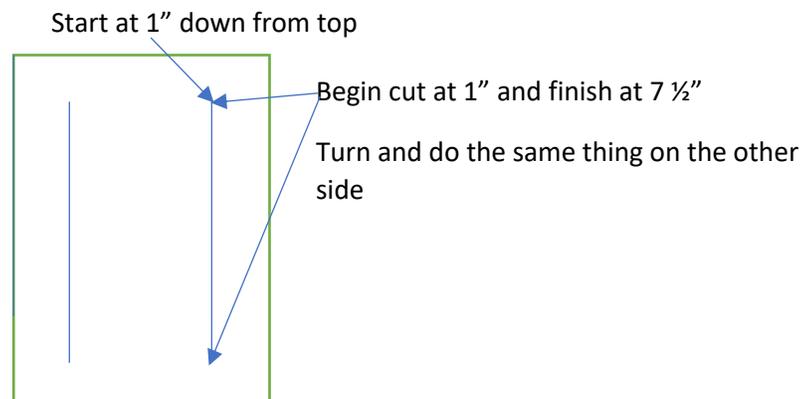

Inside Layers: (2) 1 7/8" x 2 7/8"

**Designer Paper:**

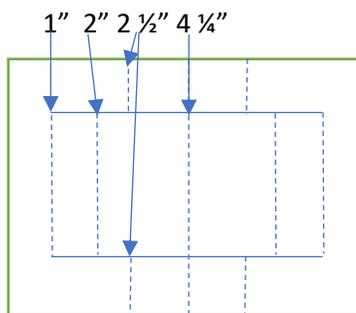

Panels: (2) ¾" x 5"

(4) ¾" x 1 ½"

**Cutting and Scoring your Mechanism:**

TURN your cardstock with long side on top (on the 2 ½" you only score on top and bottom).

When you reach the 4 ¼" mark, turn and repeat on the opposite side.

### 6 x 6 Size Version -

Here are the measurements and things you will need to know:

Base card is 6" x 12" and scored at 6".

Outside layers: First layer is 5 1/2" x 5 1/2"; the next layer is 5 1/4" x 5 1/4" and the top layer is 5" x 5".

Inside layers: the inside base layer is 5 1/2" x 11 1/2"; the book ends are 5/8" x 3 3/4"; the bottom book layers are 3" x 3 3/4" (you need two of them); the top book layers are 2 3/4" x 3 1/2" (you need two of them).

with the 5 1/2" side on top, place your cardstock at 3/4"; bring down your cutter to the 1 3/4" mark and cut down until you get to the 9 3/4" mark. As long as you have the numbers, take these and watch the video and it will all be clear! Now flip this and repeat the same for the other side (you now have two cuts in your cardstock).

with the 12" side on top, it's time to score our piece - On the top and bottom piece (the 3/4" pieces), score at 3 3/4" and 7 3/4"; next score from the very top to the very bottom at 5 3/4"

keep your cardstock in the same position and we are going to score the **inside** (or book) part now - score at 1 3/4"; 2 1/2"; (then skip over the 5 3/4" because you've already done this one); 9" and 9 3/4".

Refer to the video to show you how to fold and adhere to the cardbase.
